

UN Nutrition Journal

GUIDELINES FOR CONTRIBUTORS

The Editorial Board of UN Nutrition Journal welcomes contributions for future issues. Submission of an article does not guarantee publication. All potential acceptable manuscripts are peer-reviewed under the guidance of the Editorial Board. The UN Nutrition Editorial Team routinely edits manuscripts and, where necessary, condenses the text and omits tabular and illustrative material.

Please direct any queries to the UN Nutrition Journal Editor-in-Chief at: info@unnutrition.org

Submission: Please submit your contributions by using the UN Nutrition <u>Publications and Events Manager</u>, located here (<u>https://www.unnutrition.org/web/documents/</u>). If you encounter difficulties in using the system, please inform the UN Nutrition Secretariat by sending an email to <u>info@unnutrition.org</u> with the title "Publications and Events Manager malfunction". You will then be assisted in using the system.

Biographical information: Please include biographical information, including affiliation of all authors and email of corresponding author.

Language and format: Manuscripts should be submitted in Microsoft Word format, in English. Since UN Nutrition publications are read and used by a variety of academic and professional individuals involved in nutrition, the style of the manuscript should be written in plain English (avoid colloquial expressions as well as professional jargon). Please refer to the preferred spellings guidance.

Length: Contributions should not exceed the following word count:

- Feature articles: 3,000 words
- Innovations or insights: 1,500 words
- Letter to the Editor-in-Chief: 500 words

Brief extract and key words: With any feature article, please include a brief extract of 3-5 key point sentences stating the purpose of the paper, main findings, and principal conclusions. Please emphasize new and important aspects of the paper and five key words for indexing.

Permission: Authors are responsible for obtaining permission from the copyright holder(s) to reproduce any material with copyright protection.

Tables and Figures: Tables and figures should be submitted electronically in separate files (either in Excel, Word, or high-resolution image files such as JPEG and PGN).

Links to the web: The UN Nutrition Journal format offers online readers the opportunity to link directly from publication online. Therefore, please include relevant links in the body text, either as hyperlinks or in brackets following the phrase to be linked. This is particularly relevant when specific organizations, institutions, programmes, or projects are mentioned. Please remember that hyperlinks do not replace references.

Referencing: Please see the Reference Style guide overleaf.

UN Nutrition Journal

REFERENCE STYLE

General guidance

- References should be listed single-spaced at the end of the manuscript.
- Where a quotation is used in the text, the page number of the reference should be provided.
- Please provide complete information for each reference, including full journal titles and complete list of authors: use of et al. should be avoided.
- Please limit your list of references to not more than 35 sources; also, please take care to reference important research findings, statistics and survey results.
- In the body text references should be listed using the author and year of publication (ie Barker 1994), without commas.

In the bibliography, please use the following style:

Journal Article: Green L, Lucas AL, Livinston M (1995) Relationship between early diet and subsequent cognitive performance during adolescence. *Biochemistry and Social Transaction* 23(4S): 376-9.

Book: Barker DJP (1994) Mothers, Babies, and Disease in Later Life. BMJ Publishing Group: London.

Chapter in Edited Book: Martorell R (1991) Maternal height as an indicator of risk. In Krasovec K and Anderson M (eds.) *Maternal Nutrition and Pregnancy Outcomes.* Pan American Health Organization: Washington DC.

Conference Proceedings: UNICEF/UNU/WHO/MI (1999) *Preventing Iron Deficiency in Women and Children: Technical Consensus on Key Issues*. Technical Workshop, October 7-9, 1998. International Nutrition Foundation and Micronutrient Initiative: Boston and Ottawa.

United Nations Document: WHO/UNICEF/ICCIDD (1999) *Progress Towards the Elimination of Iodine Deficiency Disorders (IDD).* WHO/NHD/99.4 World Health Organization: Geneva.

Government Report: Nigeria (1990) The Tobacco Smoking (Control) Decree, Decree No.20. 25 June 1990. *International Digest of Health Legislation*, 1990, 41(4):640-1.

General Report: ACC/SCN (1997) Third Report on the World Nutrition Situation. ACC/SCN:Geneva.

Unpublished Report: World Health Organization (1988) *Guidelines for leishmaniasis control at regional and subregional level*. (Unpublished document WHO-LEISH/88.25; available from Division of Control of Tropical Diseases, World Health Organization, 1211 Geneva 27, Switzerland).

Personal Communications: Beaton G (1999) Personal communication.

UN Nutrition Journal

PREFERRED SPELLING

This is a general guide to spelling used by UNSCN. British rather than American spelling is normally used. The general rule is to follow the spelling listed in the latest edition of The Concise Oxford dictionary. However, there are several exceptions, some of which are listed below.

When there is a choice between using the suffix –ize or –ise, ize is preferred. Foreign words are italicized. Hyphens are used for compound adjectives or only when an adverb might be mistaken for an adjective (little-used car vs. little used car); some compound words remain hyphenated irrespective of their grammatical use: Vice- President, Director-General, side-effect.
